In Q1 to Q11, only one option is correct, choose the correct option:

1. Which of the following methods do we use to find the best fit line for data in Linear Regression?
- |                       |                       |
|-----------------------|-----------------------|
| A) Least Square Error | B) Maximum Likelihood |
| C) Logarithmic Loss   | D) Both A and B       |

Answer: (A) Least Square Error

2. Which of the following statement is true about outliers in linear regression?
- |   |   |
|---|---|
| A) Linear regression is sensitive to outliers | B) linear regression is not sensitive to outliers |
| C) Can't say                                  | D) none of these                                  |

Answer: (A) Linear regression is sensitive to outliers

3. A line falls from left to right if a slope is \_\_\_\_\_?
- |             |              |
|-------------|--------------|
| A) Positive | B) Negative  |
| C) Zero     | D) Undefined |

Answer: (B) Negative

4. Which of the following will have symmetric relation between dependent variable and independent variable?
- |                 |                  |
|-----------------|------------------|
| A) Regression   | B) Correlation   |
| C) Both of them | D) None of these |

Answer: (B) Correlation

5. Which of the following is the reason for over fitting condition?
- |                                |                              |
|--------------------------------|------------------------------|
| A) High bias and high variance | B) Low bias and low variance |
| C) Low bias and high variance  | D) none of these             |

Answer: (c) Low bias and high variance

6. If output involves label then that model is called as:
- |                           |                     |
|---------------------------|---------------------|
| A) Descriptive model      | B) Predictive modal |
| C) Reinforcement learning | D) All of the above |

Answer: (B) Predictive model

7. Lasso and Ridge regression techniques belong to \_\_\_\_\_?
- |                     |                      |
|---------------------|----------------------|
| A) Cross validation | B) Removing outliers |
| C) SMOTE            | D) Regularization    |

Answer: (D) Regularization

---

**MACHINE LEARNING**

8. To overcome with imbalance dataset which technique can be used?
- A) Cross validation
  - B) Regularization
  - C) Kernel
  - D) SMOTE

Answer: (D) SMOTE

9. The AUC Receiver Operator Characteristic (AUCROC) curve is an evaluation metric for binary classification problems. It uses \_\_\_\_\_ to make graph?
- A) TPR and FPR
  - B) Sensitivity and precision
  - C) Sensitivity and Specificity
  - D) Recall and precision

Answer: (C) Sensitivity and Specificity

10. In AUC Receiver Operator Characteristic (AUCROC) curve for the better model area under the curve should be less.
- A) True
  - B) False

Answer: (b) False

11. Pick the feature extraction from below:
- A) Construction bag of words from a email
  - B) Apply PCA to project high dimensional data
  - C) Removing stop words
  - D) Forward selection

E) Answer: (a) Construction bag of words from a email (b) Apply PCA to project high dimensional data

**In Q12, more than one options are correct, choose all the correct options:**

12. Which of the following is true about Normal Equation used to compute the coefficient of the Linear Regression?
- A) We don't have to choose the learning rate.
  - B) It becomes slow when number of features is very large.
  - C) We need to iterate.
  - D) It does not make use of dependent variable.

Answer: (a) We don't have to choose the learning rate.  
(b) it becomes slow when number of features is very large

**Q13 and Q15 are subjective answer type questions, Answer them briefly.**

13. Explain the term regularization?

**Answer:** It is a technique to prevent the model from overfitting by adding extra information to it. Regularization works by adding a penalty or complexity term to the complex model. Let's consider the simple linear regression equation:

14. Which particular algorithms are used for regularization?

**Answer:**

- Ridge Regression.
- LASSO (Least Absolute Shrinkage and Selection Operator) Regression.
- Elastic-Net Regression.

15. Explain the term error present in linear regression equation?

**Answer:**

The difference between the expected price at a particular time and the price that was actually observed.
